

# YAKIMA VALLEY COLLEGE & PERRY TECHNICAL INSTITUTE

## COMBINED DEGREES

Through a cooperative agreement between Yakima Valley College and Perry Technical Institute, students have the opportunity to earn both an Associate of Applied Science Degree from YVC and a PTI certificate.

The following PTI programs are eligible:

**Electrical Technology:** Perry Technical Institute's 24-month program offers students a diversified curriculum that guides them through the process of becoming electricians. During classroom, lab and fieldwork experiences, students gain valuable theory while incorporating current NEC codes and WAC/RCW rules, laws, and procedures with hands-on application.

**Heating, Ventilation, Air Conditioning & Refrigeration Technology:** Perry Technical Institute's 24-month program covers all aspects of the field, from refrigeration fundamentals to direct digital control and energy management systems.

**Instrumentation & Industrial Automation Technology:** Perry Technical Institute's 24-month program introduces students to today's world of computerized industrial automated manufacturing.

By completing a designated PTI program and earning an additional 32 credits through YVC, students can graduate with an Associate of Applied Science degree from YVC and a certificate from Perry Tech.

After paying the PTI registration fee, accepted students are eligible to begin the required courses at YVC. YVC offers both online and in-seat classes. Previously earned credits may apply.

For more information about this combined degree, please contact the YVC Counseling Center at 509.574.4956.

# YVC's Additional Required Credits
