**Job Summary:**

Provide electrical and Control Systems services with specific responsibility for identifying repair and/or replacement needs; installing, repairing, maintaining, and upgrading electrical systems and equipment; assisting other skilled trades; and ensuring that tools and materials are available at job site.

**Job Duties:**

Assemble, install, test, and maintain electrical or electronic wiring, equipment, appliances, apparatus, and fixtures, using hand tools and power tools.

1. Assemble, install, test, diagnose malfunctions and maintain electrical power equipment, motor controls, PLC controls, instrumentation, appliances, apparatus, and fixtures, using hand tools, power tools and test equipment in accordance with NEC and local codes.
2. Inspect electrical systems, equipment, and components to identify hazards, defects, and the need for adjustment or repair, and to ensure compliance with codes.
3. Advise management on whether continued operation of equipment could be hazardous.
4. Maintain current electrician's license or identification card to meet governmental regulations.
5. Plan layout and installation of electrical wiring, equipment, and fixtures, based on job specifications and local codes.
6. Direct and train workers to install, maintain, or repair electrical wiring, equipment, and fixtures.
7. Assist the Lead Mechanic and Maintenance manager to rebuild the machines if necessary.
8. Continuously look for ways to improve process efficiency and notify immediate supervisor of observations and recommendations.
9. Meet with department supervisor and team members to assess progress and discuss needed changes.
10. Work in conjunction with Lean Manufacturing Principles in the Pellet Plant.
11. Maintain sanitary and safe work environment and follow safety requirements.
12. May actively participate on company's Safety Committee.
13. Ensure that company safety policies as well as federal, state and local safety and environmental regulations are observed.
14. Must have a complete understanding of company's policies, SOPs, QPs, EPs, HACCP and cGMP to ensure quality, safety, efficiency and sustainability.
15. Must adhere to all company policies.
16. Examine documents, materials, and products and monitor work processes to assess completeness, accuracy and conformance to standards and specifications.
17. Follow all SOPs.
18. Verify and sign off on trainee's hours for Labor and Industries as required.
19. Perform all other duties as assigned by Manager and/or designee.
